

This series of newsletters is for anyone interested in gathering information about Planet X, otherwise known as: Nibiru, and it's impending passage. I will be issuing monthly newsletters, and as Earth changes progress, perhaps every 2 weeks.

If this newsletter arrives in your inbox, and you are not interested in the contents, I urge you to save them in a folder for future use as you will need to know certain things when the time comes. You are not likely to have help from any government or local agencies, as they will be preoccupied, which I will explain later. I assure you, this knowledge is hard to come by, and in a rush to get information, you will not likely find any other that is more accurate, other than it's reference source:

www.Zetataalk.com.

General contents

- Recent indicative Earth change events.
- Relevant and verified images and videos.
- Detailed explanations and questions answered.
- Protecting yourself during the Poleshift.
- Initial survival techniques and Aftertime conditions.
- Preparation suggestions.

Moreover, these newsletters are targeted at giving the readers accurate information to help create a viable poleshift survival plan. My purpose with these Newsletters is to help enable the reader to personally act to prepare for the passage of Planet X/Nibiru and do well in what we call the "Aftertime".

Please Note: This subject on the internet, is extremely broad ranging with many unrelated agendas that are confusing and contradictory to the poleshift event, especially around it's timing. Additionally, there are very active misinformation campaigns against it by very powerful self-interest groups, so *please*, do not expect the awareness of the presence of Planet X to be reflected in the main news media. There is a massive cover-up on Planet X. Mainstream News media is controlled by Corporations and governments and are not allowed to report on Planet X, so *do not* expect to ever have the comfort of some major news announcement.

www.Zetataalk.com

The Zetataalk website is the mother of accurate information on Planet X. It is telepathically communicated from beings in the 4th dimension called Zeta, directly to Nancy Lieder who is the person solely responsible for zetataalk.com and is 100% credited for this work, notwithstanding the Zeta.

The Zetataalk website is very large, with thousands of web pages, which is why I am creating these NewsLetters as a compendium of critical information about Planet X and the Earth poleshift for the reader with little time or skills to do this research.

Planet X Primer

Planet X or Nibiru, is not a planet, but a small brown dwarf star with an entourage of orbiting moons that form 2 "tails" that also contain various sized rocks, Red iron oxide dust and other debris. Nibiru is highly magnetic and normally appears a slight glowing red under "usual" circumstances.

The above picture is not a actual photo, but a computer-generated approximation. Historical drawings depict it as a "winged disk" icon in stone carvings: *refer to 1st graphic*.

Planet X has a 3,657 year passage cycle. It orbits between binary Suns, our own and it's dead twin. It enters our solar system on it's ancient path, and when it passes by earth, it stops Earth's rotation. Earth's continents will then suddenly and dramatically increase the natural slow pace of tectonic movement creating a world wide global catastrophe. All systems will go down, so figure on no distributed water, food or electricity. No telecommunications. For those who saw the aftermath of the Haiti earthquake January 10th 2010, that is an indication of what it will be like, except that 500 to 600 foot tides are expected in addition to what Haiti experienced.

Remaining governments will most likely break down: those government employees will be in the "same boat" as you. Be also wary of remnants of military forces as they will almost certainly become self-interested as well. *Much more* about Planet X and it's effects and causes in forthcoming issues.

Preparation is the key to dealing with this inevitability. If you leave it too long, you will be with everyone else attempting to stock food, tools and equipment all at the same time - scrambling. My advice is: don't wait until Nibiru is visible by the eye (*within* 4 months of the main Event). In future newsletters I will provide the information and sources to study and get advice about what to watch for and how to prepare for this.

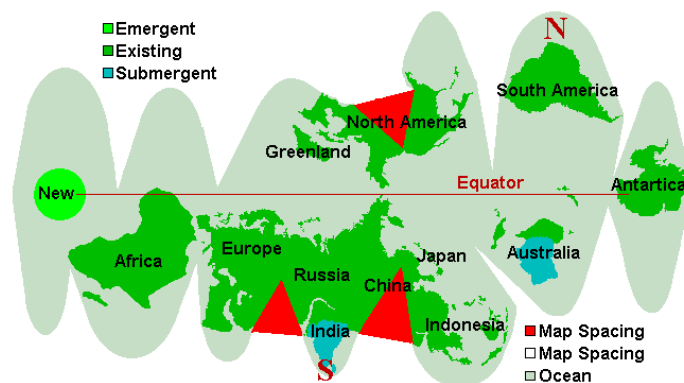

Crazy making

When something is obvious and those in the immediate environment do not respond to it, pretending it isn't there, it's like the saying: "There's an elephant in the room". You see the elephant, others see it, but they don't say anything, they just continue on like everything is "normal". I feel crazy. I want somebody besides myself to say: "Wow, there's an elephant in

the room!” But no support is forthcoming. *This* is what you have to get used to if you are seeking support from people close to you about Planet X. Nobody is going to come to your rescue or back you up in getting ready for the poleshift, at least *plan* on that. Government agencies will not respond to your inquiries and will lie to you, your friends will look at you like you are nuts, acquaintances will begin to ignore you, and worst of all your family will endure you with slightly pained faces. Don't bother with seeking consensus, start preparing *now*.

New Geography

The image below represents the axis and the geography of our Earth after the poleshift. Some good news - For those who live in North America, notice how close we are to the equator, this is similar to the current climate in Southern China or Mexico.

Note: Map may be printed and taped together to form a new globe.

[Click on the Image for a larger version to use.](#)

The Earth will take on new South-North axis points (notice the equator) with a 90° movement.

Connect the dots

For those skeptics reading this, the key is to “connect the dots”. Most of us over 35 or 40 have heard about earthquakes, usual weather events, etc. all our lives. The important thing here is the frequency, event intensity and how the cover-up is played by the big boys: NASA, U.S Military, CIA and mainstream news agencies. They use misdirection, silence and misinformation to maintain the cover-up.

If you want to do your own research, you do it without some government saying this, the mainstream news saying that and NASA saying the other to support you in your quest for the Truth about Planet X. I have done the work, never mind the contactee experience, the raw data is *there*. I will explain the contactee status in future newsletters.

The Zeta's

Here, you will need to suspend your cultural belief system and try a more cosmic one on for size. In a nutshell, the Zetas originate from a star system called: Zeta Reticuli. Their culture is in

excess of 50,000 years of continuous development. Their souls occupy a small body with a large head and are extremely intelligent, far beyond that of the common human intelligence. They communicate telepathically.

Recent Earth Events

The following events are listed here because they give indication of the Proof of Earth changes directly due to Planet X in our vicinity.

- Central Mexico: Early February [fire ball](#) leaves 30 meter crater.
- Mexico City: Very unusual [cloud formation](#), formed from 5.9 Richter earthquake heretofore unknown atomic particles created by highly compressed rock.
- [Earthquake in Illinois?](#) Forerunner to the big quake to happen as a key flag for Planet X progression – The “new madrid” fault line. Predicted to happen years ago by the Zeta's.
- West Coast waves [creeping higher](#): 30% increase in 10 years, that's a lot.
- Ever heard of a meteo-tsunami? Tasmania [experienced](#) a rare tide event. Atmospheric cause.
- Very odd radar “image” caught in Australia: This one is very interesting; an image of something not visible by human eye, but visible by radar: Magnetic phenomenon directly caused by the nearby presence of Planet X. Zeta explanation [here](#).
- Globes or planet-sized objects near the sun: Hello? These are stray moons from the tail of Planet X. Zeta's explain [here](#).
- Amazing “artifact” in [Norwegian Aurora](#). Photoshop? Look [here](#) viewed by thousands – the sky swirl. Zeta's [here](#) on sky swirl.

Future newsletters

I will cover surviving the poleshift, UFO's, crop circles, what to expect during the poleshift and how to prepare for it, Aftertime living, timing of the poleshift, answer questions from readers and more important Earth change news as we move forward in this amazing time.

About the author: I am 59 years old, father of 5. I am a follower of Eckankar. I am a 2007 contactee. At that time, the evidence of Planet X was not as obvious as it is now, still, dreams and other events supported the reality of Planet X at the time. I reside in Victoria, BC and enjoy my main passion of a capella singing in voice ensemble. Today, above all, my interest is to introduce Planet X, and it's influence to as many people who will listen.
